

LONG BAY, BEEF ISLAND BEACH MANAGEMENT PLAN

PUBLIC SURVEY RESULTS

Ministry of Natural Resources and Labour

September 29, 2022

OVERVIEW

The Long Bay, Beef Island Beach Management Plan Public Survey was conducted from March 18 to April 30, 2022. The Survey targeted the general population as well as students attending schools on Tortola to capture the youth perspective.

The Survey was administered via the online survey tool, Survey Monkey, as well as via print copies.

The online Survey was advertised via the following means:

- Public meetings to present the Conceptual Beach Management Plan held March 29 and 31, 2022
- Government of The Virgin Islands Website (homepage)
- Government of The Virgin Islands Facebook page
- Flyer circulated via WhatsApp
- SMS text message to all FLOW customers on April 14, 2022 and April 30, 2022
- Outreach to parents of students at participating primary and secondary schools.

Print copies of the survey were available through the following means:

- Public meetings to present the Conceptual Beach Management Plan held March 29 and 31, 2022
- Reception of the Ministry of Natural Resources and Labour
- Participating schools (upon request)

All primary and secondary schools on Tortola were invited to participate in the Survey effort. Schools were asked to have students complete the survey and also to share the survey with parents via the online link and print copies as required. Six schools participated, including:

1. Willard Wheatley Primary School
2. Joyce Samuels Primary School
3. Alexandrina Maduro Primary School
4. Ebenezer Thomas Primary School
5. Althea Scatliffe Primary School
6. Cedar International School

A total of 300 persons participated in the general population survey. Based on the size of the target population (residents), a sample size of 300 provides a 95% confidence level in the survey results with a 5% margin of error. In addition, a total of 202 students participated in the school survey. The results of general population and student surveys are reported separately.

GENERAL POPULATION RESULTS

Profile of Respondents

Age Distribution of Respondents

A total of 300 persons participated in the general population survey. Of those, the majority (54%) were middle aged, being 41-65 years old. Persons in their 30s followed, accounting for 27% of respondents with persons in their 20s accounting for 11% of respondents. Together, persons between the ages of 21 and 65 accounted for 92% of respondents. The elderly (over 65 years) and adolescents (13-20 years) were least represented, accounting for 5% and 3% of responses accordingly. See Figure 1.

Figure 1. Age distribution of respondents participating in the general population survey.

Gender of Respondents

Of the 300 survey respondents, the majority, 72%, were female while 28% were male. See Figure 2.

Figure 2. Gender of respondents participating in the general population survey.

Status of Respondents

Virgin Islanders made up the majority of the 300 survey respondents at 55% of the total. The participation of Residents and Belongers was similar, representing 23% and 22% of respondents respectively. No tourists participated in the survey. See Figure 3.

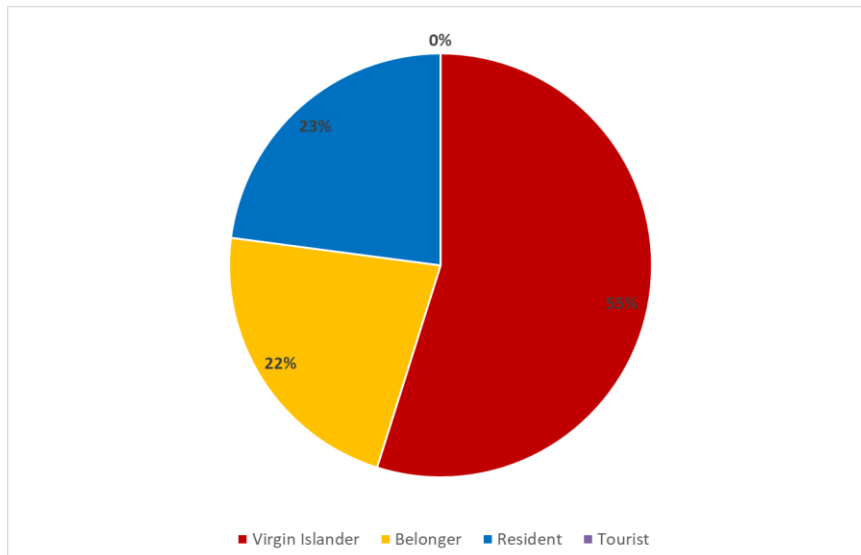

Figure 3. Status of respondents participating in the general population survey.

Address of Respondents

Participation in the survey reflected proximity of residence to the beach with participation increasing with closer proximity. Of the 300 respondents, 8th District residents participated most in the survey (32% of respondents), followed by 7th District residents (17% of respondents), and 5th and 6th District residents (10% and 9% of respondents respectively). Participation of 2nd and 3rd District residents was even at 8% of respondents. Participation of 4th District residents was the least at 6% of respondents. See Figure 4.

Figure 4. Address of respondents participating in the general population survey.

Importance of Long Bay to Respondents

Of the 300 survey respondents, the majority, 66%, indicated that Long Bay is “very important” to them. Another 26% of respondents indicated that Long Bay is “important”. Together, persons indicating Long Bay as “very important” or “important” accounted for 92% of respondents. Of the balance, 7% of respondents were neutral, indicating that Long Bay was “neither important or unimportant” to them. Only 1% of respondents indicated that Long Bay was “not very important.” No respondents described Long Bay as “not important at all.” See Figure 5.

Figure 5. Importance of Long Bay to respondents participating in the general population survey.

Frequency with which Respondents have Traditionally Used Long Bay

Of the 300 survey respondents, the majority (90%) traditionally used Long Bay “a few times a year” or more frequently. Persons traditionally using the beach “a few times a year” comprised the largest category, accounting for 32% of respondents. This was followed closely by persons who used the beach “at least once a month”, accounting for 30% of respondents. Together, persons traditionally using the beach “at least once per week” or “more than once per week” accounted for 28% of respondents. Only 6% of respondents traditionally used the beach as infrequently as “at least once a year” and 3% of respondents traditionally used the beach “less than once a year.” No one participated in the survey who had never used the beach. See Figure 6.

Figure 6. Frequency with which respondents participating in the general population survey have traditionally used Long Bay.

Vision for Long Bay

Views about Development at Long Bay

Of the 300 survey respondents, the majority (52%) felt that some commercial development should be allowed at Long Bay in the limited, careful and balanced manner described. Together, 42% of respondents felt that either development should be limited to basic public amenities and facilities with no permanent commercial activity allowed (24%) or the beach should be preserved in a natural, undeveloped state (18%). Only 5% of the respondents felt that the beach should be commercially developed as a major tourist destination. See Figure 7.

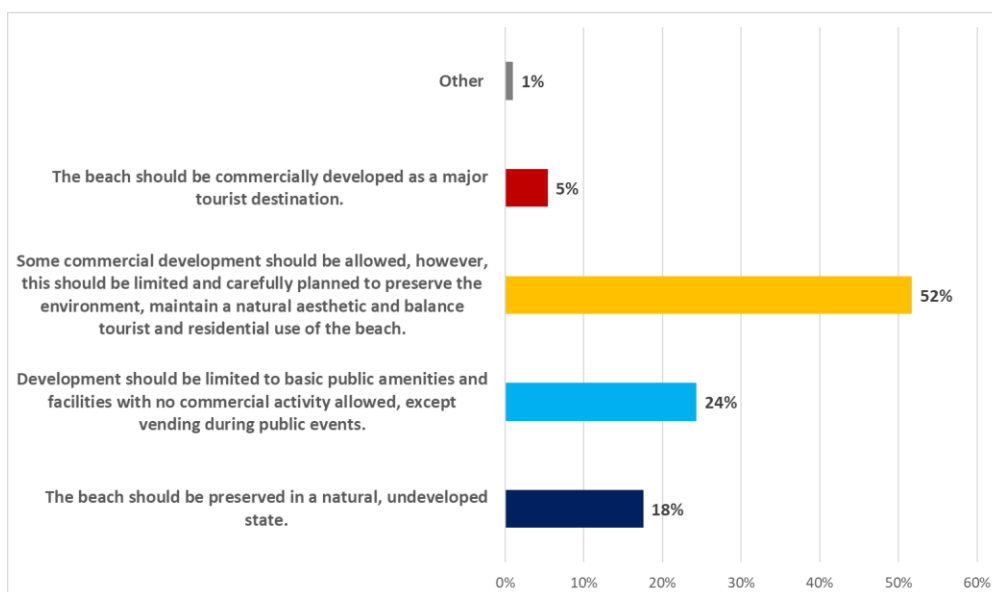

Figure 7. Views about development at Long Bay held by respondents participating in the general population survey.

Current Satisfaction and Desires

Effect of Recent Development and Activity at Long Bay on Beach Use and Enjoyment

As a result of the recent development and activity at Long Bay, of the 300 survey respondents, 51% enjoy the beach less and 48% use the beach less often. On the other hand, only 18% of respondents enjoy the beach more and 12% use the beach more often. There was no change in enjoyment of the beach for 32% of respondents and no change in frequency of beach use for 40% of respondents. See Figure 8.

Figure 8. Effect of recent development and activity at Long Bay on the beach use and enjoyment of respondents participating in the general population survey.

Satisfaction with the Overall Environment

Respondents were mainly “completely satisfied” or “satisfied” with 8 of the 12 features of the overall environment surveyed as summarized below. See Figure 9 and Table 1 for detailed results.

Instances reflecting the majority of respondents (50% or more)	Instances of the most frequent/common response, but not reflecting the majority of respondents (less than 50%)
Water area appearance (77%)	Relaxing environment (47%)
Sand quality (74%)	Safe environment (45%)
Seawater quality (68%)	Beach appearance (Area from treeline to sea) (40%)
Beach width (Distance from treeline to sea) (61%)	
Family-friendly environment (53%)	

Respondents were mainly dissatisfied (**“totally unsatisfied”** or **“unsatisfied”**) with 3 of the 12 features of the overall environment surveyed as listed below. See Figure 9 and Table 1 for detailed results.

Instances reflecting the majority of respondents (50% or more)	Instances of the most frequent/common response, but not reflecting the majority of respondents (less than 50%)
Overall beach cleanliness (53%)	Shade trees/vegetation (49%)
	Noise level (47%)

Respondents were mainly **“neutral”** on 1 of the 12 features of the overall environment surveyed as summarized below. See Figure 9 and Table 1 for detailed results.

Instances reflecting the majority of respondents (50% or more)	Instances of the most frequent/common response, but not reflecting the majority of respondents (less than 50%)
N/A	Reef health/quality (43%)

Figure 9. Satisfaction of respondents participating in the general population survey with the overall environment.

Desired Changes to the Overall Environment

Respondents mainly desire “**more of**” 7 of the 12 features of the overall environment surveyed as summarized below. See Figure 10 and Table 2 for detailed results.

Instances reflecting the majority of respondents (50% or more)	Instances of the most frequent/common response, but not reflecting the majority of respondents (less than 50%)
Overall beach cleanliness (80%)	N/A
Shade trees/vegetation (78%)	
Beach appearance (Area from treeline to sea) (59%)	

Reef health/quality (57%)	
Relaxing environment (56%)	
Family-friendly environment (54%)	
Safe environment (53%)	

Respondents mainly desire “less of” or “none” of 1 of the 12 features of the overall environment surveyed as summarized below. See Figure 10 and Table 2 for detailed results.

Instances reflecting the majority of respondents (50% or more)	Instances of the most frequent/common response, but not reflecting the majority of respondents (less than 50%)
Noise level (57%)	N/A

Respondents mainly desire the “same level” of 4 of the 12 features of the overall environment surveyed as summarized below. See Figure 10 and Table 2 for detailed results.

Instances reflecting the majority of respondents (50% or more)	Instances of the most frequent/common response, but not reflecting the majority of respondents (less than 50%)
Seawater quality (58%)	N/A
Sand quality (57%)	
Water area appearance (52%)	
Beach width (Distance from treeline to sea) (52%)	

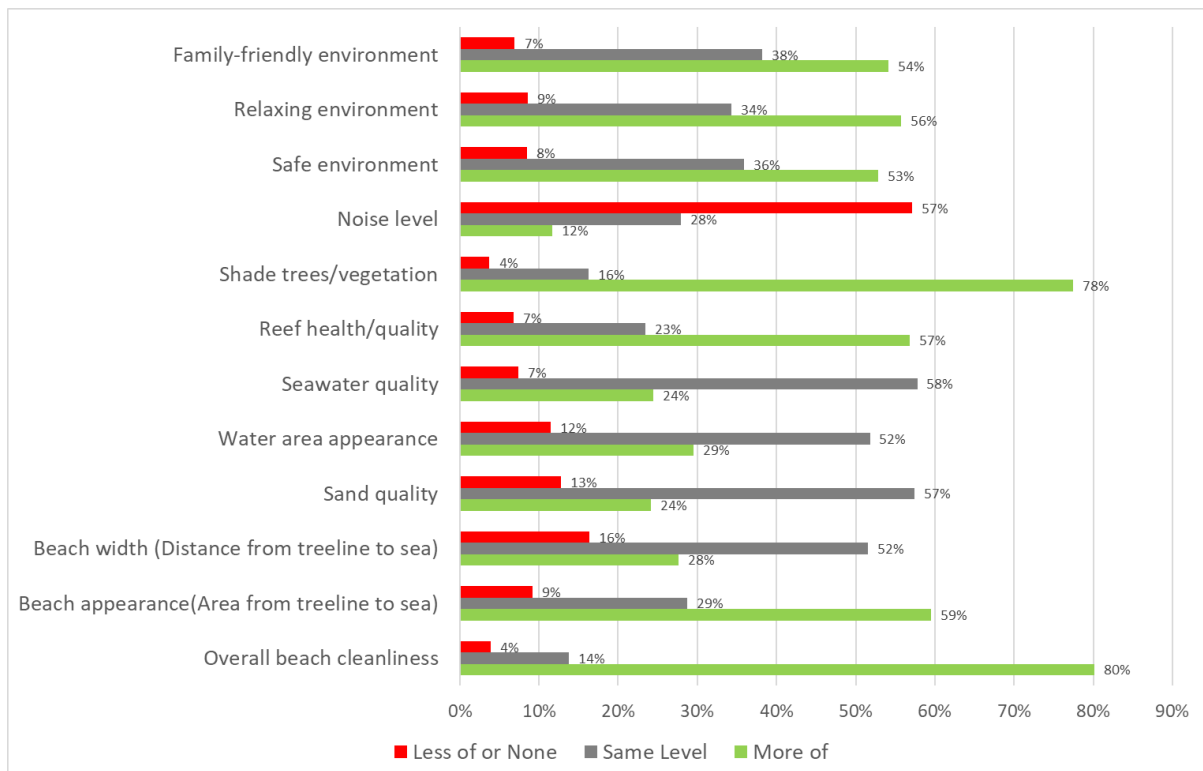

Figure 10. Changes desired in the overall environment by respondents participating in the general population survey.

Table 2. Changes Desired in the Overall Environment by Respondents Participating in the General Population Survey.

Features	More of		Same level		Less of		None		Not applicable		Total Repondents
Overall Environment											
Overall beach cleanliness	80%	145	14%	25	2%	4	2%	3	2%	4	181

Satisfaction with Amenities and Facilities

Respondents were mainly “**completely satisfied**” or “**satisfied**” with 1 of the 12 amenities and facilities surveyed as summarized below. See Figure 11 and Table 1 for detailed results.

Instances reflecting the majority of respondents (50% or more)	Instances of the most frequent/common response, but not reflecting the majority of respondents (less than 50%)
N/A	Parking facilities (42%)

Respondents were mainly dissatisfied (“**totally unsatisfied**” or “**unsatisfied**”) with 7 of the 12 amenities and facilities surveyed as summarized below. See Figure 11 and Table 1 for detailed results.

Instances reflecting the majority of respondents (50% or more)	Instances of the most frequent/common response, but not reflecting the majority of respondents (less than 50%)
Lifeguard presence/station (62%)	Access for disabled people (48%)
Waste facilities (61%)	Picnic tables (48%)
	Public shade umbrellas/gazebos (46%)
	Restroom facilities (44%)
	Main access road (38%)

Respondents were mainly “**neutral**” on 4 of the 12 amenities and facilities surveyed as summarized below. See Figure 11 and Table 1 for detailed results.

Instances reflecting the majority of respondents (50% or more)	Instances of the most frequent/common response, but not reflecting the majority of respondents (less than 50%)
N/A	Birdwatching facilities (48%)
	Sporting facilities (46%)
	Entertainment facilities (42%)
	Beach use signage (37%)

Figure 11. Satisfaction of respondents participating in the general population survey with amenities and facilities.

Desired Changes to Amenities and Facilities

Respondents mainly desire “**more of**” 10 of the 12 amenities and facilities surveyed as summarized below. See Figure 12 and Table 2 for detailed results.

Instances reflecting the majority of respondents (50% or more)	Instances of the most frequent/common response, but not reflecting the majority of respondents (less than 50%)
Waste facilities (78%)	Main access road (48%)
Lifeguard presence/station (75%)	
Access for disabled people (65%)	
Restroom facilities (59%)	
Picnic tables (57%)	
Birdwatching facilities (55%)	
Beach use signage (55%)	
Parking facilities (53%)	
Public shade umbrellas/gazebos (50%)	

Respondents mainly desire “**less of**” or “**none**” of 1 of the 12 amenities and facilities surveyed as summarized below. See Figure 12 and Table 2 for detailed results.

Instances reflecting the majority of respondents (50% or more)	Instances of the most frequent/common response, but not reflecting the majority of respondents (less than 50%)
N/A	Entertainment facilities (47%)

Respondents mainly desire the “**same level**” of 1 of the 12 amenities and facilities surveyed as summarized below. See Figure 12 and Table 2 for detailed results.

Instances reflecting the majority of respondents (50% or more)	Instances of the most frequent/common response, but not reflecting the majority of respondents (less than 50%)
N/A	Sporting facilities (38%)

Figure 12. Changes desired in amenities and facilities by respondents participating in the general population survey.

Satisfaction with Recreational Activities

Respondents were mainly “**completely satisfied**” or “**satisfied**” with 2 of the 9 recreational activities surveyed as summarized below. See Figure 13 and Table 1 for detailed results.

Instances reflecting the majority of respondents (50% or more)	Instances of the most frequent/common response, but not reflecting the majority of respondents (less than 50%)
Swimming and snorkelling (60%)	N/A
Exercising (54%)	

Respondents were mainly dissatisfied (“**totally unsatisfied**” or “**unsatisfied**”) with 1 of the 9 recreational activities surveyed as summarized below. See Figure 13 and Table 1 for detailed results.

Instances reflecting the majority of respondents (50% or more)	Instances of the most frequent/common response, but not reflecting the majority of respondents (less than 50%)
Loud music (52%)	N/A

Respondents were mainly “**neutral**” on 6 of the 9 recreational activities surveyed as summarized below. See Figure 13 and Table 1 for detailed results.

Instances reflecting the majority of respondents (50% or more)	Instances of the most frequent/common response, but not reflecting the majority of respondents (less than 50%)
Private water sports (53%)	Picnics (49%)
	Barbeques/cookouts (49%)
	Parties (48%)
	Sports (47%)
	Boating (47%)

Figure 13. Satisfaction of respondents participating in the general population survey with recreational activities.

Desired Changes in Recreational Activities

There were no recreational activities that respondents mainly desired “**more of.**”

Respondents mainly desire “**less of**” or “**none**” of 3 of the 9 recreational activities surveyed as summarized below. See Figure 14 and Table 2 for detailed results.

Instances reflecting the majority of respondents (50% or more)	Instances of the most frequent/common response, but not reflecting the majority of respondents (less than 50%)
Loud music (68%)	Parties (47%)
	Boating (43%)

Respondents mainly desire the “**same level**” of 6 of the 9 recreational activities surveyed as summarized below. See Figure 14 and Table 2 for detailed results.

Instances reflecting the majority of respondents (50% or more)	Instances of the most frequent/common response, but not reflecting the majority of respondents (less than 50%)
Picnics (61%)	Swimming and snorkelling (49%)
Barbeques/Cookouts (51%)	Private water sports (40%)
Exercising (50%)	
Sports (50%)	

Figure 14. Changes desired in recreational activities by respondents participating in the general population survey.

Satisfaction with Commercial Activities

There are no commercial activities with which respondents are mainly “**completely satisfied**” or “**satisfied.**”

Respondents were mainly dissatisfied (“**totally unsatisfied**” or “**unsatisfied**”) with 1 of the 5 commercial activities surveyed as summarized below. See Figure 15 and Table 1 for detailed results.

Instances reflecting the majority of respondents (50% or more)	Instances of the most frequent/common response, but not reflecting the majority of respondents (less than 50%)
N/A	Beach chairs (44%)

Respondents were mainly “**neutral**” on 4 of the 5 commercial activities surveyed as summarized below. See Figure 15 and Table 1 for detailed results.

Instances reflecting the majority of respondents (50% or more)	Instances of the most frequent/common response, but not reflecting the majority of respondents (less than 50%)
Other commercial activity (54%)	Souvenir vending (42%)
Water sports (50%)	Bars/restaurants (38%)

Figure 15. Satisfaction of respondents participating in the general population survey with commercial activities.

Desired Changes in Commercial Activities

There are no commercial activities that respondents mainly desire “more of.”

Respondents mainly desire “less of” or “none” of 4 of the 5 commercial activities surveyed as summarized below. See Figure 16 and Table 2 for detailed results.

Instances reflecting the majority of respondents (50% or more)	Instances of the most frequent/common response, but not reflecting the majority of respondents (less than 50%)
Souvenir vending (52%)	Bars/restaurants (48%)
Other commercial activity (52%)	Beach chairs (41%)

Respondents mainly desire the “same level” of 1 of the 5 commercial activities surveyed as summarized below. See Figure 16 and Table 2 for detailed results.

Instances reflecting the majority of respondents (50% or more)	Instances of the most frequent/common response, but not reflecting the majority of respondents (less than 50%)
N/A	Water sports (35%)

Figure 16. Changes desired in commercial activities by respondents participating in the general population survey.

STUDENT RESULTS

A total of 202 students participated in the student survey. The majority of students (61%) were under 12 years old. As all students were in primary school, it can be assumed that the maximum age of the typical student surveyed was 13 years.

Of the 202 survey respondents, the majority (53%) felt that some commercial development should be allowed at Long Bay in the limited, careful and balanced manner described. This is directly in line with result of the general population survey where 52% of respondents fell in that category. The percentage of students who felt that the beach should be commercially developed as a major tourist destination was higher than in the general population, at 25%. Together, 19% of students felt that either development should be limited to basic public amenities and facilities with no permanent commercial activity allowed (10%) or the beach should be preserved in a natural, undeveloped state (9%).

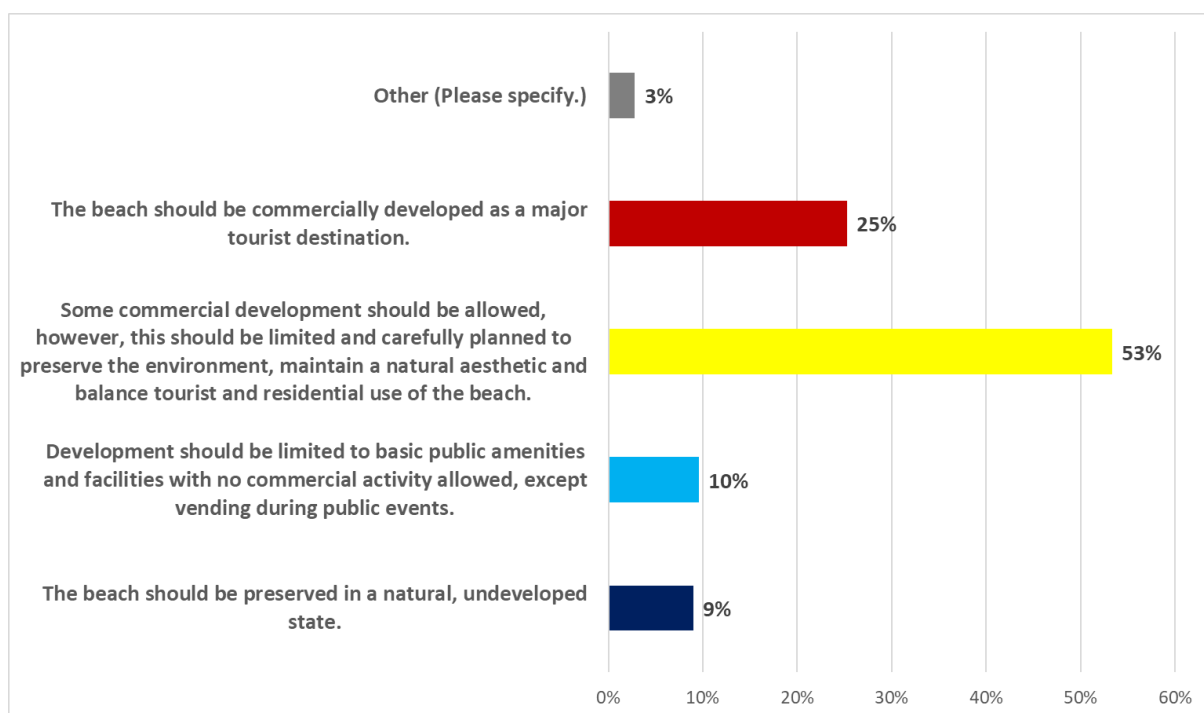

Figure 17. Views about development at Long Bay held by student respondents.

LONG BAY, BEEF ISLAND

BEACH MANAGEMENT PLAN PUBLIC SURVEY

The Ministry of Natural Resources, Labour and Immigration is conducting a survey to determine the public’s satisfaction and vision in relation to Long Bay, Beef Island. Your responses will be anonymous and used to help inform a beach management plan for Long Bay.

CURRENT SATISFACTION AND VISION

1. Please indicate your current level of satisfaction with each beach attribute below and what you would like to see changed compared to what exists now.

ATTRIBUTE	SATISFACTION	DESIRE
	Completely Satisfied (5) Satisfied (4) Neutral (3) Unsatisfied (2) Totally Unsatisfied (1)	More of (M) Same level (S) Less of (L) None (N)
Example	3	S
Overall Environment

Comments

2. How do you feel about development at Long Bay, Beef Island?
Check the box that best describes what you would like to see.

<input type="checkbox"/>	The beach should be preserved in a natural, undeveloped state.
<input type="checkbox"/>	Development should be limited to basic public amenities and facilities with no commercial activity allowed, except vending during public events.
<input type="checkbox"/>	Some commercial development should be allowed, however, this should be limited and carefully planned to preserve the environment, maintain a natural aesthetic and balance tourist and residential use of the beach.
<input type="checkbox"/>	The beach should be commercially developed as a major tourist destination.
<input type="checkbox"/>	Other _____
