

JULY - ENVIRONMENTAL AWARENESS

ENVIRONMENTAL AWARENESS

It refers to concerns for environmental protection and improvement of our surroundings. By teaching our friends and family that the physical environment is fragile and indispensable, we can begin fixing the problems that threaten it. Take some time during the month of July to do something positive for your environment today.

Leslie Maduro of Department of Agriculture along with Jahnai Caul and Akeem Leonard of Greencrete VI plant a Caribbean Cherry tree and Soursop tree with students at the Robinson O'Neal Memorial Primary School. Photo credit: www.seedsoflovevi.org

SISTER ISLANDER OF THE MONTH CECIL CHINNERY

Cecil Chinnery is from the sister island of Jost van Dyke. He is a supervisor at the Water and Sewerage Department, owns a mechanical shop and a truck service. He began working at a very young age and never seems to get tired of helping the community. He is always a part of Jost van Dyke's

clean up campaigns. He offers the use of his truck and on numerous occasions also transports goods from the dock to government offices, free of charge. Mr. Chinnery serves the people as an effective and aggressive advocate on virtually every important environmental issue that faces the island of Jost van Dyke.

green TIP OF THE MONTH

SAVE ENERGY TO SAVE MONEY

Look out for the attractive, locally-designed and built recycling bins made from old pallets. They are now ready to receive clean plastics, glass and cans. Before year's end additional bins will be available throughout Virgin Gorda, Pockwood Pond and the islands of Anegada and Jost van Dyke.
